

CONSTRUCTION

Descon Engineering is recognized as one of the leading construction firms operating in the region. The breadth of our involvement ranges from complex facility expansions to large grassroots projects.

Our construction capabilities include installation of new plants, relocation of plants and upgrades of operating facilities. Our civil/structural, mechanical, and electrical & instrumentation groups are capable of undertaking a wide variety of installation, testing and pre-commissioning activities.

The scope of construction includes:

### **CIVIL**

We are adept at handling heavy civil works for industrial buildings and facility infrastructure projects. This expertise extends from earthworks to finishes. The civil team has a proven track record in completing 'fast track' projects consisting of industrial plants, buildings and infrastructure development.

While our plant construction teams are proficient at working within the confines of process and

energy plants, our team for heavy civil works for facility infrastructure development are equally experienced with the management of warehousing & logistics required.

### **MECHANICAL**

We provide mechanical construction services for grassroots projects as well as for expansion / revamping of existing facilities comprising of installation of equipment (including heavy lifts), piping / pipeline / pipe racks, steel structure, tanks, painting, insulation, testing and pre-commissioning.

### **ELECTRICAL & INSTRUMENTATION**

Our Electrical & Instrumentation group can undertake a wide variety of installation, testing and pre-commissioning services.

The scope includes:

- Distributed Control Systems (DCS)
- Cathodic Protection Systems
- SCADA and PLC Configurations
- Power Distribution Networks
- Telecommunications
- Grounding and Lighting
- Substations
- Grid Connection
